# Retail banking overview

Conscious interim decision to recycle lower returning home lending capital while returns are uneconomic and as we deliver our scalable low cost to serve digital banking platform

## Summary

- > Contracted lower returning legacy platform origination, including decision to pause BOQ and VMA broker channels
- > Continued to grow home lending through lower cost to acquire ME channel
- > Margins stabilised in 2H24
- > Anticipate returning to growth once we have reduced our cost to serve through digital mortgages
- > \$0.5bn growth in deposits on FY23, driven by term and \$1.5bn in digital deposits, positively contributing to the Group’s funding profile
- > Continued momentum in credit cards, insurance and superannuation supporting non-interest income
- > Focus remains on scaling our low cost to serve digital banking platform and progressing the branch conversion

## Home lending growth (\$m)

## Deposit funding (\$bn)

# Business banking overview

Returned to growth in 2H24 reflecting a focus on targeted specialist segments and an investment into frontline bankers

## Summary

- > Strategic shift to recycle capital to accelerate growth in higher returning segments, 2H24 business lending growth of 7%<sup>(1)</sup> broadly in-line with system
- > Targeted growth in specialist sectors of healthcare, agriculture and owner occupied commercial property
- > Deposit balances reduced 1% as margins were optimised in the term deposits portfolio and liquidity was prudently managed
- > 10 new frontline bankers, with plans to invest in up to an additional 40 bankers in key growth corridors over the next two years
- > Sector-led operating model creating enhanced experiences and segmentation that allows customers to grow with their banker
- > Smaller portfolios and ongoing investment in technology supporting more time with customers, with 56% of settlement flow through direct channels in FY24

Lending growth (\$m)

Deposit funding (\$bn)

(1) Growth rate has been annualised

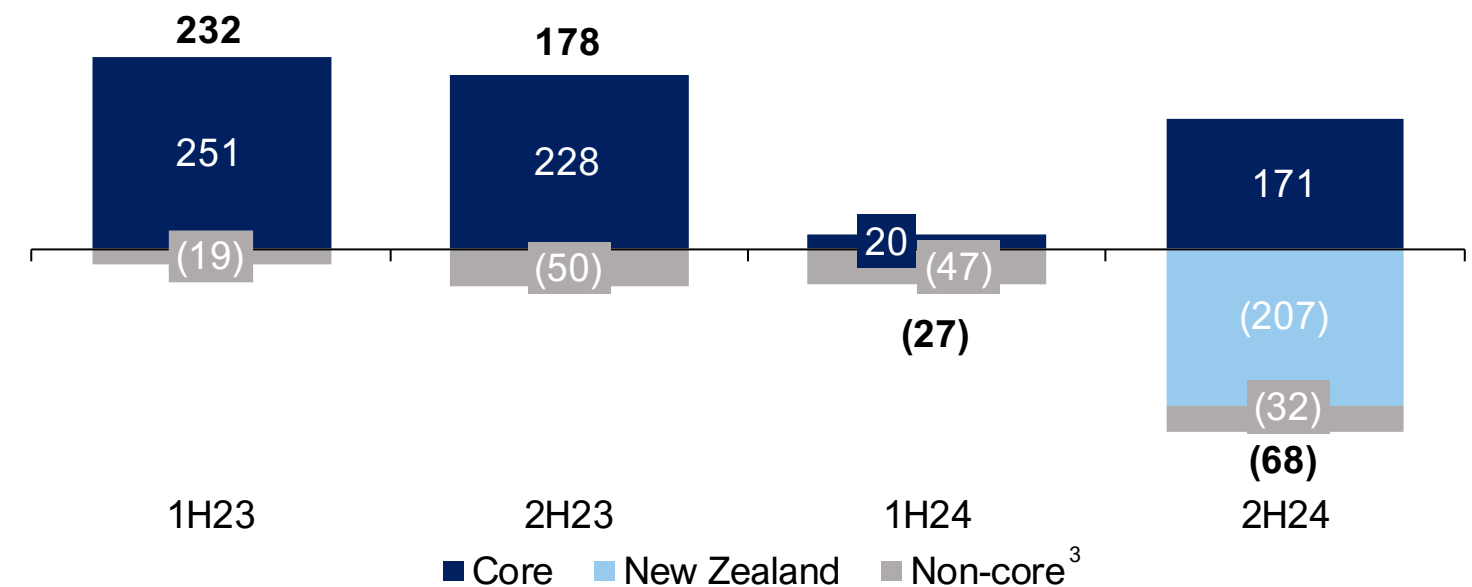

# BOQ Finance overview

A strategic asset for the Group, delivering diversified asset-based lending to individual and business customers with a quality credit profile and capacity for further growth

## Summary

- > A \$6.9bn specialist business delivering niche product capability across asset backed lending to businesses and individuals
- > Completed the sale of the New Zealand asset portfolio, excluding this impact underlying growth<sup>1</sup> was 4% in 2H24
- > Return to growth in core product lines in 2H24, as supply chains normalised
- > Quality mix of underlying assets that are well diversified across industry segments
- > Capacity for growth with relative advantage to key competitors in cost of funding<sup>2</sup>, scale of distribution and exposure to growth markets

Asset finance lending growth (\$m)

(1) Growth rate has been annualised

(2) Refers to competitors who have key product lines consistent with the BOQ Finance business only and does not imply that BOQ Group total cost of funding is an advantage to full scale banks

(3) Includes the vendor finance business and movement in the New Zealand portfolio of assets prior to its sale on 31 March 2024, both of which were deemed to be non-core elements of the BOQ Business portfolio during the year

# Key elements

Stronger second half trends with higher total income, margin stabilisation, growth in business lending and increased customer deposit balances

**Total income (\$m)**

**Net interest margin (%)**

**Lending GLAs (\$bn)**

**Customer deposit balances (\$bn)**

# Net interest margin

Margin stabilisation driven by fixed to variable housing mix shift and replicating portfolio benefits

## Summary

- > Tailwind from portfolio mix as fixed rate loans moved into variable
- > Competition and retention discounting continuing to impact asset margins
- > Funding headwinds as the TFF matured impacting wholesale funding
- > Tailwind from replicating portfolio, lower liquids and lower 3<sup>rd</sup> party costs

## 1H25 considerations

- > Expect margin to be broadly flat in a stable cash rate environment
- > Competitive impacts on lending margins offsetting positive housing mix impacts
- > Continued but moderating funding impact
- > Replicating portfolio benefit to continue

## Net interest margin (%) – 1H24 to 2H24

# Operating expenses

Inflation and investment in transformation, technology, risk and compliance partially offset by simplification

## Operating expenses (\$m)

## FY25 considerations

- > Targeting broadly flat total costs
- > Persistent, but moderating inflationary pressures
- > Simplification benefits to continue
- > Lower investment spend
- > Amortisation spend increasing as transformation delivered and digital assets released to market
- > Increased branch costs from conversion in 2H25

# Transformation investment

Foundational digital bank build largely complete, investment spend has peaked

## Investment spend (\$m)

## Summary

- > Investment spend has peaked as the foundational digital bank build is largely complete
- > Lower ongoing investment required as spend transitions to run and enhance
- > Growth in assets under construction balance slowing. Amortisation uplift in FY25 and FY26
- > Increased percentage of OPEX investment spend as a percentage of total investment spend

## Software intangible asset balances (\$m)

Note: Integration costs and Remedial Action Plans are not included in cash earnings  
 (1) Includes \$35m in amortisation and \$9m in software intangible simplification

# Multi-year transformation investment

Investment spend has peaked, supporting the transformation to a simpler, specialist bank

Investment spend profile (\$m)<sup>1,2</sup>

## Delivered

- > Foundational digital bank build largely complete
  - > Deposit capabilities for all digital brands, deposit migration commenced
  - > First digital mortgage originated
  - > Banker tools complete and cloud platform on track
- > ME integration target synergies delivered within cost guidance
- > Property footprint reduced
- > Contact centre consolidation
- > Cloud and technology simplification on track
- > RAPs submitted and approved by both regulators
- > Other strengthen programs include; open banking, regulatory reporting, cyber security and collections platform

(1) Investment spend includes initial \$60 million provision for Remedial Action Plans and ME integration costs

(2) FY20 does not include ME Bank, FY21 reported on a pro forma basis

# Portfolio quality

Portfolio quality remains sound, arrears impacted by higher interest rates and cost of living pressures

## Loan impairment expense

## Provisions (\$m)

## Housing, Asset finance and Commercial arrears 90DPD (bps)

## Impaired assets (\$m)

# Funding & liquidity

Strong funding and liquidity settings as TFF fully repaid, focus on growing customer deposits

## Liquidity strength<sup>1</sup>

## Funding strength

## Funding mix (\$bn)

## Long term wholesale funding (\$bn)

(1) Liquidity coverage ratio and net stable funding ratio reported on a spot basis

# Capital strength

Strong capital position, 17c fully franked final dividend

## Summary

- > CET1 ratio remains well managed at the top end of management target range<sup>1</sup> at 10.66%
- > The DRP will operate with no discount and is expected to be satisfied in full by an on-market purchase of shares
- > Strong position supporting the continued transformation of the business

## CET1 (%) – 1H24 to 2H24

Note: CET1 includes a \$50m capital overlay as determined by APRA in relation to BOQ's Court Enforceable Undertaking

(1) Management target range unchanged at 10.25–10.75%

(2) 1H24 dividend of 17c, DRP operated with no discount and was satisfied by the issuance of new shares. Participation was 9.4%

(3) Includes credit and operational RWA movements, including loan origination costs and data refinements

(4) Capitalised expenses net of amortisation

(5) Restructuring costs incurred as a result of a Group operating model review to simplify the business

(6) Other movement includes mark to market movements in the fair value of the HQLA portfolio which remain economic when held to maturity and a higher capital deduction for Deferred Tax Assets in excess of Deferred Tax Liabilities

# OUTLOOK & SUMMARY

# FY25 Outlook

- › An improvement in the Australian economy is likely in the coming financial year although the strength of the improvement is uncertain
  - › There is heightened uncertainty due to the global outlook, low productivity and increasing consumer and business caution
  - › Supportive factors include a resilient labour market, fiscal support and declining global (and potentially domestic) cash rates
- › Anticipate stable margins, revenue benefits from business bank growth in specialist areas and branch conversion, partially offset by further reductions in mortgage balances
- › Targeting broadly flat expense growth as simplification program initiatives offset inflation, higher amortisation and increased costs relating to branch conversion
- › Transformation investment spend reducing materially, as the foundational build of the digital bank has largely been completed
- › Capital is expected to remain within the management target range of 10.25–10.75% and will be impacted by ~30bps due to the branch conversion, recognised at conversion date
- › BOQ asset quality remains sound, diversified and well collateralised with anticipated LIE increase from current low levels

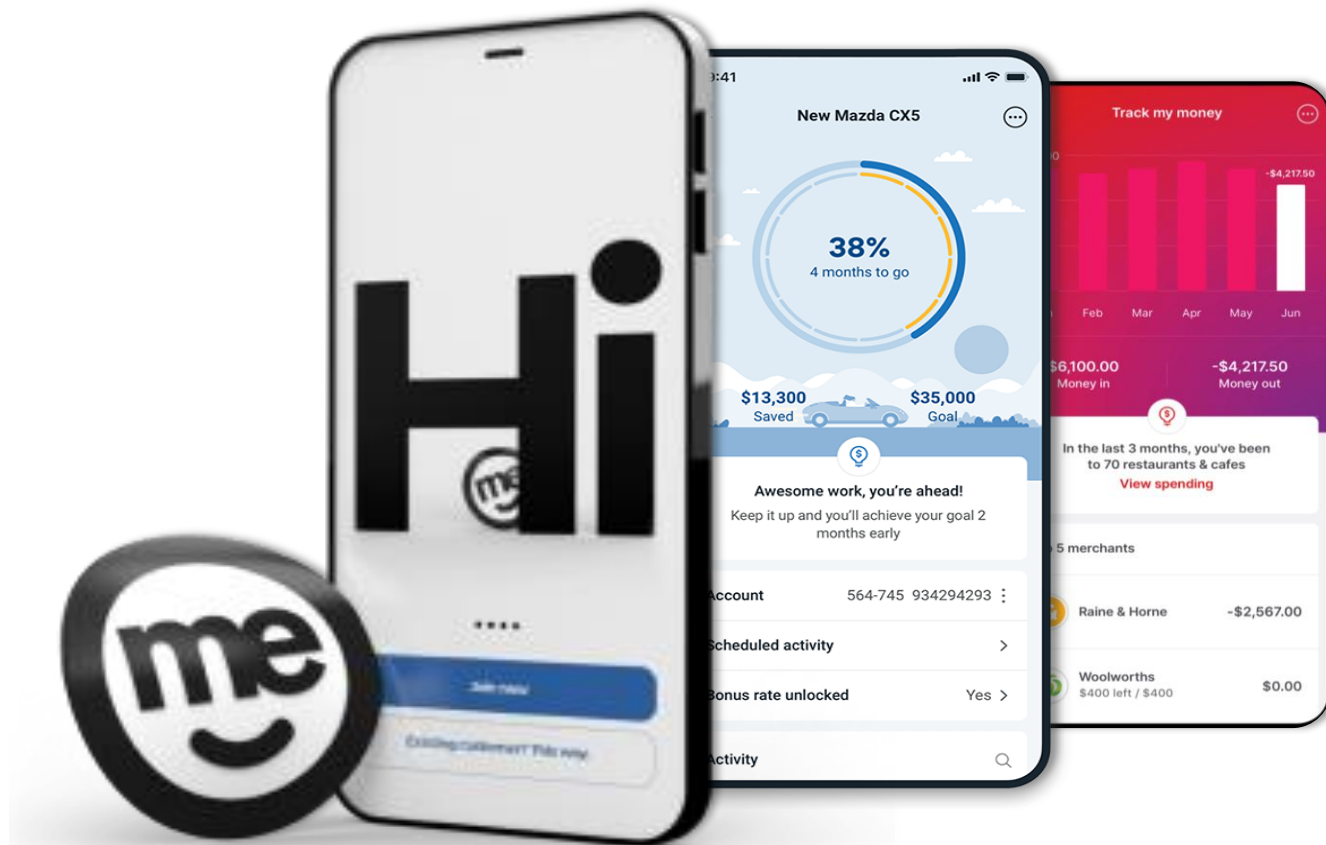

# Summary

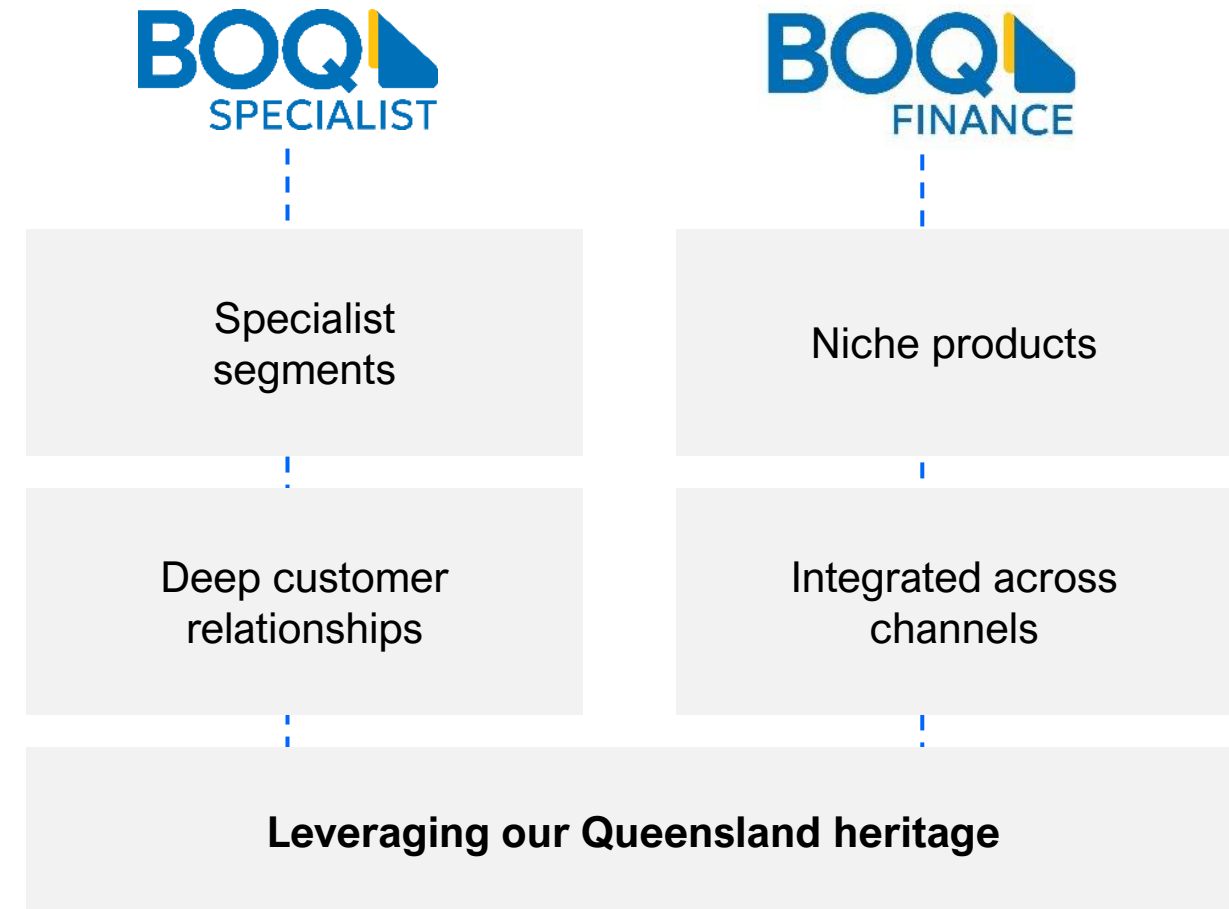

- > Strong progress demonstrating execution proof points
- > Foundational digital bank build largely complete, focus shifting to customer migration, scaling digital mortgages and decommissioning legacy systems delivering material productivity benefits
- > Shifting portfolio mix to higher returning assets, leveraging the strength of our specialist business bank
- > Clear pathway to delivering FY26 ROE target of 8%, with strategy to deliver further uplift in the medium term
- > Support the government review of small and medium sized banks
- > BOQ is transforming to a simpler, specialist bank with an enhanced customer experience

# Transforming to a simpler, specialist bank

# NET INTEREST MARGIN

# Net interest margin – FY23 to FY24

## Tailwinds

- > Portfolio mix as fixed rate loans moved into variable
- > Replicating portfolio benefits
- > Benefits from rising rate environment

## Headwinds

- > Retention discounting
- > Deposit competition
- > Increased wholesale funding costs
- > Front to back book spreads

## Net interest margin (%) – FY23 to FY24

# Replicating portfolio<sup>1</sup>

## Summary

- > Replicating portfolio has an investment term of 5 years, this remains appropriate in current market conditions
- > In FY24 the portfolio contributed 9bps to NIM
- > For every 0.25% decrease to the RBA cash rate, the uninvested capital and low cost deposit portfolio will decrease NIM by ~1bp

## Replicating portfolio

	1H24 Balance (\$bn)	2H24 Balance (\$bn)	2H24 Avg. Return	Exit Return Rate	Investment Term
Capital	4.1	4.1	2.94%	3.15%	5 years
Low cost deposits	4.2	4.2	2.80%	2.98%	5 years
<b>Total Replicating Portfolio</b>	<b>8.3</b>	<b>8.3</b>	<b>2.87%</b>	<b>3.06%</b>	<b>5 years</b>

(1) Replicating portfolio is a tool to manage interest rate risk

# Hedging costs - basis risk

## Summary

- › Increase in exposure to Basis Risk slowed in 2H24 due to growth in variable rate lending products only slightly outpacing growth in at call liabilities
- › The impacts of hedging costs had a positive 1bp NIM impact in FY24
- › Current sensitivity is c.0.5bp of NIM for every 5bps in basis swap spread

## Long term basis risk avg - 16 bps

# PORTFOLIO QUALITY

# Collective provisioning

Prudent provisioning reflective of a changing environment

## Provision model assumptions

- > Base case reflects BOQ’s forward looking economic assumptions and is supported by RBA forecasts where available
- > Downside scenario represents stagflation effects, with higher interest rates, a falling GDP and rising unemployment for the first two years
- > The forward-looking nature of AASB9 means that prudent assumptions can be maintained in uncertain economic times. Assumptions are revised regularly based upon the economic outlook and portfolio positioning

## House price index and unemployment

## Economic forecasts (calendar year) (%)<sup>1</sup>

(1) Economic forecasts reflect calendar year end numbers and were prepared as at August 2024, based on RBA and market consensus at the time and prepared for the purpose of collective provision updates

# Housing loan portfolio

Diversified portfolio with conservative LVR lending

## Summary

- > Housing portfolio diversified across geography and channel
- > ~98% of customers with LVR =<90%, with 2H24 flow above 90% at 1.2%
- > 2H24 flows from home loan customers with LVR>80% increasing to 7.8% from 6.2% in 1H24

## Housing portfolio by geography (%)

## Housing portfolio by LVR (%)

Asset finance by industry (%)

Asset finance by channel (%)

# Commercial portfolio

Continued focus on target segments

## Summary

- > Commercial portfolio diversified geographically
- > Property and construction industry segments are well diversified and performing well with no material indication of stress. These segments will continue to be monitored given current market conditions
- > Commercial by channel disclosure will change in future reporting periods. Operating model changes have simplified and aligned distribution channels

## Commercial by industry (%)

## Commercial by geography (%)

## Commercial by channel (%)

# Business Bank lending portfolio

Well diversified and underpinned by quality security

## Summary

- > Business Bank portfolio diversified geographically with a diverse channel mix
- > The portfolio is well secured with less than c.12% of unsecured lending
- > No material industry stresses emerging and losses remain benign

## Business portfolio security status by industry

## Enhanced diversification over time

### Housing loans - geographic split over time (%)

### Asset finance - industry segments over time (%)

### Commercial - industry segments over time (%)

### Total lending - geographic split over time<sup>2</sup> (%)

### Summary

- > Enhanced geographic diversification, Queensland housing portfolio reducing from 50% in FY17 to 31% in FY24
- > The addition of ME has further diversified the geographic diversity of the housing portfolio
- > Asset finance and commercial lending portfolios remain diversified across a broad range of industries

(1) FY17 has not been restated to include ME

# Emerging risks to portfolio quality

## Macro economic environment

- › Cash rates are likely at their peak, anticipate any rate reductions to occur early in 2025
- › Interest rates over the next decade are likely to be higher than they have been over the past one
- › There continues to be growth in house prices albeit performance is mixed across the country, affordability remains a concern
- › The global economy has absorbed high inflation and interest rates well. There is uncertainty about the outlook for the Chinese economy
- › Some asset prices may be vulnerable to unexpected economic or financial market developments
- › The labour market remains strong, although it is gradually weakening
- › Business margins are becoming compressed from higher costs and slowing revenue growth

## Outlook for credit losses

- › Loan impairment expense remains at historically low levels
- › BOQ has retained prudent collective provision scenario weights with 45% weighting to downside scenarios
- › Provisions cater for the risk of increasing arrears in Housing portfolios, although further house price growth is expected to benefit these portfolios. Overlays are held for regions experiencing weakening house prices
- › Overlays in place for key industries that will be impacted by higher inflation and interest rate environment
  - › Commercial real estate sector risks remain given economic conditions, no material losses or increasing arrears have been observed
- › BOQ remains well provisioned and has prudently factored the changing outlook into our provisioning outcomes
- › Loss experience is expected to normalise from current low levels. With a well secured portfolio and prudent provisioning levels, BOQ is well positioned for a changing credit loss environment

 (2) Senior unsecured maturities greater than or equal to \$100m shown but excludes private placements  
 (3) Redemption of subordinated debt notes and additional tier 1 notes at the scheduled call date is at BOQ's option and is subject to obtaining prior written approval from APRA

# Term deposits

## Summary

- › FY24 growth in term deposits moderated due to lower funding requirements
- › Term deposit and at-call acquisition pricing converged through FY24 as TD carded rates normalised to pre-COVID spreads to BBSW
- › Spreads are expected to improve with lower funding requirements in FY25 reducing reliance on TD's

## Historical BOQ TD carded rates compared to BBSW (%)

# Credit rating

## Current debt ratings<sup>1</sup>

Rating Agency	Short Term	Long Term	Outlook
S&P	A-2	A-	Negative
Fitch	F2	A-	Stable

# ECONOMIC ASSUMPTIONS

# Macro economic environment<sup>1</sup>

Economic growth has been weak with elevated inflation

## Macro economic

- › Economic growth was slow in the first half of the calendar year 2024, with a gradual weakening of the labour market
- › Weak growth in household disposable incomes has been the main economic problem over the past financial year, this has started to change
- › Anticipate inflation to decline further over the coming financial year although uncertainty surrounds the pace of the decline
- › Our projection is that the cash rate has peaked. It is not expected that rates will fall until the first half of the calendar year 2025
- › There is also uncertainty about the economic outlook, notably around developments in the global economy and consumer saving behaviour

(1) BOQ house view

# Housing, business lending and deposit outlook<sup>1</sup>

Economic growth has been weak with elevated inflation

## Housing outlook

- › A modest rise in the unemployment rate is expected over the next 6-12 months
- › Consumer confidence has been heavily impacted by the rise in the cost of living and higher interest rates
- › Strong population growth at a time of limited supply has underpinned the rise of house prices
- › Anticipated Australia-wide house prices to continue to rise over the next year, with performance mixed across regions
- › Housing credit is projected to grow by around 6% in the coming financial year<sup>2</sup>

## Business lending outlook

- › Growth of business order books has slowed over the past six months
- › The weakness of consumer discretionary spending is impacting firms
- › Cost pressures remain an issue for many companies
- › Worker availability remains a constraint for some sectors although it is less of an issue than it has been for the previous couple of years
- › Business credit is expected to grow by around 5.6% in the 2025 financial year<sup>2</sup>

## Deposits outlook

- › Some increase in the household saving rate is likely this year as household disposable income growth improves and consumer caution remains elevated
- › Higher interest rates has boosted the attractiveness of deposits
- › Deposit growth is expected to be around 6.5% in the next financial year<sup>2</sup>
